

# BUILD AND SEE YOUR FIELD

FieldAP is a boundary breaking new tool for field development, planning and costing, and serves as a collaboration platform between experts, disciplines and companies involved in a life of field perspective.

The FieldAP solution emerged from a close dialogue and cooperation with some of the worlds leading and most innovative field operators and solutions providers – describing a problem and desire for better and more efficient ways to develop, plan and operate their fields.

Xvision has been a world leading provider of visual engineering for clients in the subsea domain for more than 15 years. Our core team and co-founders are all experienced senior professionals within visual design, software development and oil & gas engineering.

## BUILD THE FIELD

Allowing the discipline experts create the solution - fast and intuitive – with a pre-developed 3D asset library. Specific vendor assets library can also be used.

## COST DASHBOARD

Connecting the asset library and pre-defined activities cost to get an instant view of cost consequence of an action, change or version

## ACTIVITY PLANNING

Visualize the installation and operation activities with location and timeline in realtime 3D right in your browser

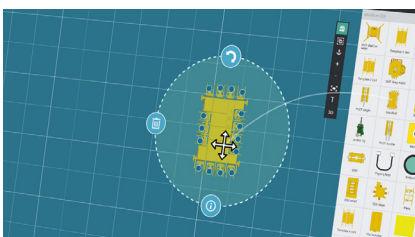

## COLLABORATION

Allowing multi-location interactive work – visualizing interfaces, scope split, responsibilities and activities - securely in the cloud

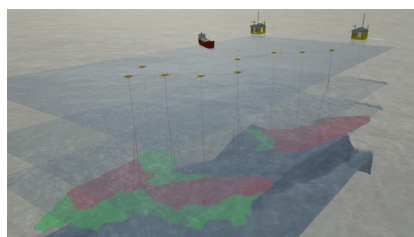

## DATA EXCHANGE

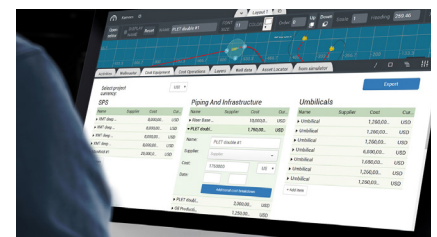

Import and export data from any source with Rest API - integrate with cost, pipe simulation, well production and other applications.

Drag and drop assets, connect and build your field right in your browser - store your field securely in the cloud.

Plan and collaborate with all stakeholders involved in realtime 3D. Bring in bathymetry and reservoir data.

Clone, explore and compare different scenarios to determine the cost impacts of design decisions.

FIELDAP - THE DIGITAL FIELD
